THAT WHICH IS CLAIMED IS:

- 1. A method of treating dry eye disease comprising administering to a subject in need of such treatment a therapeutically effective amount of a lantibiotic in a pharmaceutically effective carrier.
 - 2. The method according to claim 1, wherein said lantibiotic is duramycin.
- 3. The method according to claim 1, wherein said administering involves topical administration of said compound.
 - 4. The method according to claim 3, wherein said topical administration is via a carrier vehicle selected from a group consisting of drops of liquid, liquid washes, gels, ointments, sprays and liposomes.

15

5

5. The method according to claim 3, wherein said topical administration comprises infusion of said compound to said ocular surface via a device selected from a group consisting of a pump-catheter system, a continuous or selective release device and a contact lens.

20

- 6. The method according to claim 1, wherein said administering is systemic administration of said compound.
- 7. The method according to claim 6, wherein said systemic administration involves administration of a liquid/liquid suspension of said compound via nose drops or nasal spray, or administration of a nebulized liquid to oral or nasopharyngeal airways of said subject, such that a therapeutically effective amount of said compound contacts lacrimal tissues of said subject via systemic absorption and circulation.
- 8. The method according to claim 6, wherein said systemic administration of said compound is accomplished by administering an oral form of said compound,

5

such that a therapeutically effective amount of said compound contacts lacrimal tissues of said subject via systemic absorption and circulation.

- 9. The method according to claim 6, wherein said systemic administration involves administration of an injectable form of said compound, such that a therapeutically effective amount of said compound contacts lacrimal tissues of said subject via systemic absorption and circulation.
- 10. The method according to claim 6, wherein said systemic administration involves administration of a suppository form of said compound, such that a therapeutically effective amount of said compound contacts lacrimal tissues of said subject via systemic absorption and circulation.
- 11. The method according to claim 6, wherein said systemic administration involves administration of an intra-operative instillation of a gel, cream, powder, foam, crystals, liposomes, spray or liquid suspension form of said compound, such that a therapeutically effective amount of said compound contacts the lacrimal tissues of said subject via systemic absorption and circulation.
